

ANKIAMBOM RICHCAL CHIA

Software Engineer — Full-Stack Web & Mobile

Yaoundé, Cameroon richcalchia@gmail.com +237 672 772 213 github.com/tolztoy linkedin.com/in/richcalchia

SUMMARY

Software Engineer building full-stack web and mobile applications from database design through production deployment. Skilled in React, Next.js, Node.js, and PostgreSQL, with working knowledge of Flutter, Docker, and WordPress. Known for shipping real, working software — a live internship-matching platform, an npm-published security CLI, a Kubernetes-deployed microservices system, and a released mobile app.

PROJECTS

InternBeacon — Internship Matching Platform [React 19](#) · [Node.js](#) · [PostgreSQL](#) · [Socket.IO](#) Live — internbeacon.vercel.app

- Full-stack platform matching Cameroonian university students with companies; final-year thesis project, now live in production.
- 50+ REST endpoints serving students, companies and admins; explainable 5-factor matching algorithm scoring fit 0–100.
- Real-time chat & notifications with Socket.IO; AI CV parsing with multi-provider fallback (Gemini, Groq, Grok).

skillci — Security & Testing CLI for AI Agent Skills [TypeScript](#) · [Node.js](#) Published on npm

- Static analysis detecting prompt injection and credential theft in AI agent skills; runs offline with zero external dependencies.
- GitHub Actions integration that fails CI on findings; YAML scenario-testing framework.

BloodBridge — Emergency Blood Donor Discovery [Node.js](#) · [Docker](#) · [Kubernetes](#) github.com/tolztoy/bloodbridge-soa

- 6 independent microservices with JWT security and Swagger docs; Docker-containerized and deployed to Kubernetes.
- Donors matched to hospital requests by blood type and proximity, alerted via SMS/email; Jest & Vitest test suites.

Pass It — Exam Paper Sharing App [Flutter](#) · [Dart](#) · [Supabase](#) github.com/tolztoy/pass_it

- Cross-platform mobile app with gamified points, leaderboards, and offline caching for low-connectivity campuses.
- ML Kit document scanning, QR access, Row Level Security and PKCE auth; signed APKs shipped via GitHub Releases.

EXPERIENCE

Software Development Intern — Effulgence Tech, Yaoundé Oct 2025 – Feb 2026

- Built and maintained responsive client websites using WordPress and Elementor; managed e-commerce listings with WooCommerce.
- Conducted UI/UX audits across multiple live client sites, fixing layout and responsiveness issues.
- Applied on-page SEO (keyword optimization, meta tags, alt text) for a digital content client.

EDUCATION

B.Sc. Software Engineering — The ICT University, Yaoundé Oct 2023 – Jul 2026

SKILLS

Languages:	TypeScript, JavaScript, Dart, SQL
Frontend:	React.js, Next.js, Tailwind CSS, Flutter
Backend:	Node.js, Express, PostgreSQL, Supabase, REST APIs, Socket.IO
DevOps:	Docker, Kubernetes, Git, GitHub Actions, CI/CD

CERTIFICATES

- Google Project Management Professional Certificate
- Flutter and Dart: Developing iOS, Android, and Mobile Apps
- Learning Linux for LFCA Certification (Specialization)
- Version Control
